

I'm writing to express my support for K-Love being on local FM. When I am traveling and get to listen to K-LOVE in a community I'm in it brightens my day and helps me focus on the truth of God and life's true meaning, purpose, and values. I even try to listen to it at work online because it adds value to my day. It is time for leaders to STOP replacing and STAND UP for encouraging, life - giving programs. People need hope. People need love and truth. People need leaders to stand up for values. With the removal of encouraging programs like K-Love, it reinforces hopelessness to members of community. It leads to questions like 'Why wouldn't we (America) want positive and encouraging things on the air? What's wrong with that? Why can't we listen to something that gives life? What if I'm not driven my money, aren't my rights valued?' As leaders in this nation, decisions that are made frame attitudes, and either reinforce or tear down the moral fabric our nation was founded on. It's time to be a light for hope and for God.
